

Nabil Ben Haribou

Cybersecurity Student & Full-Stack Developer

nabilharibou@gmail.com

Profile

Cybersecurity student and full-stack developer interested in ethical hacking, secure web development, and practical penetration testing. I build web applications with modern frontend and backend technologies while developing strong foundations in networking, Linux, and application security.

Technical Skills

Cybersecurity: Ethical hacking, penetration testing fundamentals, network security, web application security

Tools: Kali Linux, Nmap, Wireshark, Burp Suite, Metasploit

Backend: Django, Django REST Framework, Spring Boot, REST APIs

Frontend: React, Vite, TypeScript, JavaScript, modern UI development

Databases & DevOps: SQL databases, Docker, Git, GitHub, Linux

Projects

Secure Appointment Management System

Secure web application built with Django REST and React for managing appointments with authentication and role-based access.

E-Commerce Web Application

Full-stack e-commerce platform with product catalog, shopping cart, and API integration built with Spring Boot, React, Vite, and TypeScript.

Local Web Penetration Testing Lab

Personal lab environment for practicing web application penetration testing using Kali Linux, Metasploit, Nmap, Wireshark, and Burp Suite.

Student Management Dashboard

Reusable admin dashboard with data tables and authentication built with modern frontend tools.

Education & Learning

Cybersecurity Studies

Focused on networking, ethical hacking, secure development, and cybersecurity fundamentals.

Current

Full-Stack Development Practice

Building practical applications with Django, Spring Boot, React, Vite, and TypeScript.

Projects

Security Learning Path

Practicing offensive security workflows and strengthening hands-on skills with professional security tools.

In Progress

Certifications & Goals

- CompTIA Security+ – In Progress
- Certified Ethical Hacker (CEH) – Planned
- OSCP – Long-term goal

Languages

Arabic, French, English
